DETAILED ACTION

Election/Restriction

1. Claim 2 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 3, directed to the species of Figure 1 is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Oath/Declaration

2. Receipt is acknowledged of papers filed under 35 U.S.C. 119 (a)-(d) based on an application filed in Italy on January 27, 2000. Applicant has not complied with the requirements of 37 CFR 1.63(c), since the oath, declaration or application data sheet does not acknowledge the filing of any foreign application. A new oath, declaration or application data sheet is required in

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by

Mather 1,840,591.

Mather discloses a lift comprising two parallel ramps 26, 27, Fig. 2, a portal frame including a cross member 23 rigidly connected the an end of two ramps, and a pair of posts 12, actuating means 22 for lifting and lowering the cross member along the posts, and a corresponding scissor-like arrangement arranged below each one of the ramps for constant resting of the ramps on the resting surface.

Re claim 7, the scissor-like arrangement having one end pivotally articulate located near the portal frame and another end slidable along a horizontal guide 10.

Allowable Subject Matter

5. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the cited references separately discloses a lift for vehicle.
